PART I. SUMMARY OF THE STATISTICS

Comment by Mr I.J. Skinner Deputy Commonwealth Statistician

The detailed statistical tables relating to workers' compensation in the year ended 30 June 1982, as shown in Part II of this bulletin, have been compiled by the Australian Bureau of Statistics. They are derived from returns which insurers (including self-insurers) have supplied to the Workers' Compensation Commission in respect of injuries for which claims have been submitted. Injuries compensable under the Workers' Compensation Act comprise :-

- (a) injuries arising out of or in the course of a worker's employment whether received at or away from his place of employment;
- (b) diseases which are contracted or aggravated in the course of a worker's employment and to which the employment was a contributing factor;
- (c) injuries received by a worker on the journey between his residence and place of employment or on other prescribed journeys; and
- (d) injuries sustained by a worker whilst temporarily absent from his place of employment during an ordinary recess period.

Although the statistics provide a satisfactory record of cases (excluding cases of less than three days incapacity) under the Workers' Compensation Act, they do not provide a complete record of all industrial accidents to workers in New South Wales. They exclude the following : -

1. Injuries which did not result in incapacity for work for at least three days.
Although such injuries have been compensable since 20 December 1948 it has been practicable to obtain only limited statistics relating to number of cases and payments of compensation.
2. Injuries for which no claim was made under the Act.
3. Injuries sustained by workers to whom the provisions of the Workers' Compensation Act do not apply. Such workers include most self-employed persons, employees of the Australian Government, and certain groups of employees specifically excluded from the Act (e.g. the police, and casual workers employed for one period only of not more than five working days and who are employed other than for the purpose of the employer's trade or business).
4. Cases of disease caused by the inhalation of dust (except in coal mining), for which provision for compensation is made under other Acts.

In part I, the statistics are reviewed in three sections. Section A surveys the number of new cases of compensable injury reported; Section B gives particulars of the duration of weekly payments and average amount of compensation per case in respect of cases terminated; and Section C shows the amount of compensation paid. As the compensation paid in a particular year includes payments in respect of cases reported in earlier years and excludes payments yet to be made on claims not finalised by the end of the year, the compensation payments during a year cannot be related to the compensation cases reported in that year. Particulars of the average amount of compensation per case terminated in the year 1981-82 (irrespective of when the case was first reported) are given in Table 13 of Part I.

Where figures shown in this bulletin have been rounded, discrepancies may occur between sums of the component items and the totals shown.

SECTION A. NEW CASES OF COMPENSABLE INJURY REPORTED

The returns of compensation cases received for tabulation each year comprise all cases for which payments were made in the year and unfinalised cases for which no payments were made in the year. In many cases payments begin and end in the one year, but in a number of cases payments overlap from one year to another and in some instances continue for a number of years. New cases, i.e. those originating in the current year, can be distinguished from those carried forward from the previous year but a minor degree of subjective judgement is necessary in deciding whether an unfinalised case (particularly if no payment has been made by the end of the year) will ultimately prove to be compensable or will involve at least three days of incapacity.

New cases classified as fatal, permanent total disability, and permanent partial disability cases are according to the result of the accident as known by the insurer at the time of completing the return in respect of that accident. Fatal cases, for example, include cases where an employee has subsequently died as a result of injuries received at work, as well as cases where an employee is killed at work. Compensable cases are ascribed to "injury by disease" where :-

- (a) the ascribed cause of the 'injury' is slow and protracted in nature; and/or
- (b) the "injury" is ascribed to the repeated or continuous action of a mechanical, physical, or chemical cause - it is not due to a single event, but to a cause, acting imperceptibly and constantly; and/or
- (c) the person "injured" probably had some degree of pre-disposition to the development of the pathological conditions causing the injury.

The classifications used for tabulating injuries and the causes of these injuries are based on those recommended for adoption by the Tenth International Conference of Labour Statisticians. Injuries by accident are classified according to cause, nature (e.g. fracture, dislocation, etc.), and location (e.g. eye, nose, etc.) of the injury. Causes of injury are classified according to :-

- (i) the type of accident (defined as the type of event which directly resulted in the injury, i.e. the manner in which the object or substance causing the injury enters into contact with the injured person); and
- (ii) the agency causing the accident (defined as the machine, means of transport, equipment, substance, working environment, etc. which, because of its hazardous nature or condition, precipitated the event).

Particulars of new compensation cases reported during the years ended 30 June 1977 to 1982 are shown in the following table :-

TABLE 1. NEW COMPENSATION CASES REPORTED, 1976-77 to 1981-82
(Excluding cases of less than three days' incapacity)

Year ended 30 June	Injury by disease (a)	Injury by accident (a)			Total cases reported
		On periodic or other journeys (b)	In course of employment (c)	Total accident cases	
MALE WORKERS					
1977	5,559	6,723	91,306	98,029	103,588
1978	7,633	6,881	92,233	99,114	106,747
1979	8,794	6,879	91,565	98,444	107,238
1980	11,738	6,995	94,216	101,211	112,949
1981	12,379	7,996	100,958	108,954	121,333
1982	12,151	8,105	99,915	108,020	120,171
FEMALE WORKERS					
1977	1,034	4,022	13,486	17,508	18,542
1978	1,077	3,889	13,411	17,300	18,377
1979	1,366	3,642	13,635	17,277	18,643
1980	1,965	3,791	14,756	18,547	20,512
1981	2,382	4,027	16,438	20,465	22,847
1982	2,734	4,183	18,032	22,215	24,949
ALL WORKERS					
1977	6,593	10,745	104,792	115,537	122,130
1978	8,710	10,770	105,644	116,414	125,124
1979	10,160	10,521	105,200	115,721	125,881
1980	13,703	10,786	108,972	119,758	133,461
1981	14,761	12,023	117,396	129,419	144,180
1982	14,885	12,288	117,947	130,235	145,120

(a) See text preceding table. (b) As prescribed in section 7(1), paragraphs (c) and (d) of the Workers' Compensation Act. (c) Includes cases arising out of a worker's employment, and injuries sustained by a worker whilst temporarily absent from his place of employment during an ordinary recess period.

Amongst male workers, 83 per cent of the new cases reported in 1981-82 involved injuries by accidents in the course of employment etc., 7 per cent involved injuries received on periodic or other prescribed journeys, and 10 per cent were attributed to disease. For female workers, the corresponding proportions were 72, 17, and 11 per cent - reflecting the smaller proportion of females employed in the more hazardous occupations and the higher proportion of females injured whilst travelling to and from work.

The new compensation cases covered in Table 1 included the following fatal cases :-

TABLE 2. NEW COMPENSATION CASES REPORTED, 1976-77 TO 1981-82 : FATAL CASES

(Excluding cases of less than three days' incapacity)

Year ended 30 June	Male workers				Female workers				Total fatal cases
	Injury by disease (a)	Injury by accident (a)		Total males	Injury by disease (a)	Injury by accident (a)		Total females	
		On periodic or other journeys (b)	In course of em- ployment (c)			On periodic or other journeys (b)	In course of em- ployment (c)		
1977	98	97	143	338	-	28	2	30	368
1978	109	64	142	315	1	15	2	18	333
1979	94	64	163	321	2	11	7	20	341
1980	81	52	165	298	3	15	4	22	320
1981	61	82	158	301	3	12	3	18	319
1982	71	68	150	289	2	12	3	17	306

(a) See text preceding Table 1. (b) As prescribed in section 7(1), paragraphs (c) and (d) of the Act. (c) See footnote (c) to Table 1.

INJURIES ON PERIODIC OR OTHER JOURNEYS

Only a small proportion of the new compensation cases reported in a year involve injuries received on the journey to or from employment, or on the other journeys prescribed in section 7(1), paragraphs (c) and (d) of the Workers' Compensation Act. The agency of accident in journey cases reported for the first time in 1981-82 is shown in Table 3 on page 8.

TABLE 3. NEW COMPENSATION CASES REPORTED, 1981-82 : AGENCY OF ACCIDENT -

PERIODIC OR OTHER JOURNEY (a) CASES

(Excluding cases of less than three days' incapacity)

Agency of accident (b)	Male workers			Female workers		
	Fatal	Non-fatal	Total	Fatal	Non-fatal	Total
Means of transport -						
Rail transport	3	95	98	-	56	56
Motor vehicles	58	5,143	5,201	11	2,105	2,116
Other	1	287	288	1	60	61
Traffic surfaces	1	1,859	1,860	-	1,658	1,658
Other agencies	5	653	658	-	292	292
Total	68	8,037	8,105	12	4,171	4,183

(a) As prescribed in section 7(1), paragraphs (c) and (d) of the Act. (b) See text preceding Table 1.

In 1981-82, means of transport was the agency of accident in respect of 69 per cent of the new cases of injuries to male workers on prescribed journeys (motor vehicles, 64 per cent; rail transport, 1 per cent; and other means of transport, 4 per cent), while traffic surfaces was the agency in respect of 23 per cent of the cases. For female workers, the proportions were: means of transport, 53 per cent (including motor vehicles, 51 per cent), and traffic surfaces, 40 per cent. There were 68 fatal cases among male workers and 12 fatal cases among female workers in this year.

INJURIES IN VARIOUS INDUSTRIES

The "classification of employment" shown in Table 4 on page 9 (and used elsewhere in this bulletin) is prescribed by Regulations under the Workers' Compensation Act for use by insurers in compiling returns of injuries. This classification is not directly comparable with any classification adopted for the compilation of official statistics regarding industries or occupations of employees.

Cases of disease caused by inhalation of dust (except in coal mining) are excluded. Provision for compensation in these cases is made by special legislation, and they are not taken into consideration in reviewing operations under the principal Workers' Compensation Act.

In the transport group, cases relating to employees in government transport services are included if compensation is claimed under the Workers' Compensation Act. Injuries compensated in terms of the Government Railways or Transport Acts are excluded.

TABLE 4. NEW COMPENSATION CASES REPORTED, 1981-82 : CLASSIFICATION OF EMPLOYMENT
(excluding cases of less than three days' incapacity)

Classification of employment (a)	Number of cases			Proportion of total		
	Male workers	Female workers	All workers	Male workers	Female workers	All workers
				per cent	per cent	per cent
1. Agricultural, horticultural, and other rural	4,571	498	5,069	3.80	2.00	3.49
2. Amusement, art, sport	1,371	661	2,032	1.14	2.65	1.40

18. Wholesale, retail, and bond stores	11,510	3,477	14,987	9.58	13.94	10.33
19. Woodworking	3,529	197	3,726	2.94	0.79	2.57
Total cases reported	120,171	24,949	145,120	100.00	100.00	100.00

(a) As prescribed by Regulations under the Workers' Compensation Act

New cases of compensation of male workers reported in 1981-82 were most numerous in metals and machinery manufacturing (32,498), followed by construction, maintenance, etc. (15,701), wholesale, retail, etc. (11,510), mining (9,982), food and drink manufacturing (9,356), transport (7,094), building (7,049), and agricultural, horticultural etc. (4,571); these classes accounted for 81 per cent of all new cases reported for males.

Amongst female workers, new compensation cases occurred mainly in professional, etc. (5,103), personal services (4,545), wholesale, retail, etc. (3,477), metals and machinery manufacturing (2,948), food and drink manufacturing (2,064), domestic and home services (1,485), clothing, etc. manufacturing (1,408), and miscellaneous manufacturing (923); these classes accounted 88 per cent of all new cases reported for females.

AGES OF INJURED MALE WORKERS

Particulars of the ages of male workers involved in new compensation cases reported in each of the last six years are given in the following table :-

TABLE 5. NEW COMPENSATION CASES REPORTED : AGES OF INJURED MALE WORKERS

(Excluding cases of less than three days' incapacity)

Age group (years)	1976-77	1977-78	1978-79	1979-80	1980-81	1981-82
Under 20	10,766	11,314	11,781	12,331	13,968	13,745
20 to 24	15,687	16,195	16,715	17,870	19,907	20,657
25 to 29	13,970	13,888	13,696	14,489	15,457	15,714
30 to 34	12,189	12,730	12,897	13,186	14,355	14,176
35 to 39	10,552	10,556	10,396	11,174	11,761	11,860
40 to 44	9,786	9,967	9,925	10,183	11,007	10,513
45 to 49	9,678	9,955	9,331	9,552	9,833	9,569
50 to 54	8,821	9,235	9,256	9,813	10,196	9,582
55 to 59	6,643	7,129	7,509	8,291	8,448	8,350
60 to 64	3,916	4,143	4,127	4,222	4,179	4,230
65 or more	859	848	841	1,110	1,045	1,041
Not stated	721	787	764	728	1,177	734
Total	103,588	106,747	107,238	112,949	121,333	120,171

The proportionate age distribution of these male workers (excluding those with age not stated) is shown in the following table :-

TABLE 6. NEW COMPENSATION CASES REPORTED : PERCENTAGE AGE DISTRIBUTION

OF INJURED MALE WORKERS (a)

(Excluding cases of less than three days' incapacity)

Age group (years)	1976-77	1977-78	1978-79	1979-80	1980-81	1981-82
Under 20	10.5	10.7	11.1	11.0	11.6	11.5
20 to 24	15.2	15.3	15.7	15.9	16.6	17.3
25 to 29	13.6	13.1	12.9	12.9	12.9	13.2
30 to 34	11.8	12.0	12.1	11.8	11.9	11.9
35 to 39	10.3	10.0	9.8	10.0	9.8	9.9
40 to 44	9.5	9.4	9.3	9.1	9.2	8.8
45 to 49	9.4	9.4	8.7	8.5	8.2	8.0
50 to 54	8.6	8.7	8.7	8.7	8.5	8.0
55 to 59	6.5	6.7	7.0	7.4	7.0	7.0
60 or more	4.6	4.7	4.7	4.8	4.3	4.4
Total	100.0	100.0	100.0	100.0	100.0	100.0

(a) Excluding those with age not stated.

Tables V and VI of Part II show, for 1981-82, the age distribution of male and female workers grouped according to classification of employment and agency of accident respectively.

In 1981-82, cases involving male and female workers under 40 years of age accounted for 63 per cent and 60 per cent respectively of new compensation cases for these groups (excluding these cases where the age was "not stated").

For male workers, new compensation cases were most numerous in the metals and machinery class of employment. The age distribution of male workers in new cases (excluding those cases where the age was "not stated") in 1981-82 was : under 20 years, 13.4 per cent; 20 to 24 years, 18.4 per cent; 25 to 29 years, 12.2 per cent; 30 to 34 years, 9.9 per cent; 35 to 39 years, 8.6 per cent; 40 to 44 years, 8.0 per cent; 45 to 49 years, 7.8 per cent; and 50 years and over, 21.7 per cent.

For female workers, new compensation cases were most numerous in the professional etc. class of employment. The age distribution of female workers in new cases (excluding those cases where the age was "not stated") in 1981-82 was : under 20 years, 9.6 per cent; 20 to 24 years, 16.4 per cent; 25 to 29 years, 11.6 per cent; 30 to 34 years, 9.1 per cent; 35 to 39 years, 10.1 per cent; 40 to 44 years, 10.7 per cent; 45 to 49 years, 10.7 per cent; and 50 years and over, 21.8 per cent.

AGENCY OF ACCIDENT

The new accident compensation cases reported in 1981-82 are classified by the major groupings of agency of accident in the next table :-

TABLE 7. NEW COMPENSATION CASES REPORTED, 1981-82 :

ACCIDENT CASES CLASSIFIED BY AGENCY OF ACCIDENT

(Excluding cases of less than three days' incapacity)

Agency of accident (a)	Number of cases			Proportion of total		
	Male workers	Female workers	All workers	Male workers	Female workers	All workers
				per cent	per cent	per cent
Machines	9,039	1,245	10,284	8.37	5.60	7.90
Means of transport and lifting equipment	17,037	3,219	20,256	15.77	14.49	15.55
Other equipment	24,648	4,450	29,098	22.82	20.03	22.34
Materials, substances, and radiations	22,795	2,279	25,074	21.10	10.26	19.25
Working environment	20,569	6,477	27,046	19.04	29.16	20.77
Crates and other containers	6,953	1,692	8,645	6.44	7.62	6.64
Other specified agencies	4,912	2,386	7,298	4.55	10.74	5.60
Agencies not classified for lack of sufficient data	2,067	467	2,534	1.91	2.10	1.95
Total, all agencies of accident	108,020	22,215	130,235	100.00	100.00	100.00

(a) See text preceding Table 1.

Further particulars of agency of accident are given in Tables IV, VI, VII, IX, and X of Part II. In these tables, the major groupings of agency of accident, which are shown in Table 7, are classified by type of machine, means of transport, etc.

TYPE OF ACCIDENT

The new accident compensation cases reported in 1981-82 are classified by type of accident in the next table :-

TABLE 8. NEW COMPENSATION CASES REPORTED, 1981-82 :

ACCIDENT CASES CLASSIFIED BY TYPE OF ACCIDENT

(Excluding cases of less than three days' incapacity)

Type of accident (a)	Number of cases			Proportion of total		
	Male workers	Female workers	All workers	Male workers	Female workers	All workers
				per cent	per cent	per cent
Falls of and jumps by persons	17,236	4,951	22,187	15.96	22.29	17.04
Struck by falling objects	8,127	896	9,023	7.52	4.03	6.93
Stepping on, striking against, or struck by objects (excluding falling objects)	35,116	5,681	40,797	32.51	25.57	31.32
Caught in or between objects	7,920	1,153	9,073	7.33	5.19	6.97
Over-exertion, strenuous, etc. movements	26,252	5,915	32,167	24.30	26.63	24.70
Exposure to or contact with -						
Extreme temperatures	2,835	544	3,379	2.63	2.45	2.59
Electric current	209	26	235	0.19	0.12	0.18
Harmful substances or radiations	1,400	173	1,573	1.30	0.78	1.21
Other types of accident, including not stated	8,925	2,876	11,801	8.26	12.94	9.06
Total, all types of accident	108,020	22,215	130,235	100.00	100.00	100.00

(a) See text preceding Table 1.

In Table X of Part II, the new accident compensation cases reported in 1981-82 are classified by type of accident and agency of accident. The principal types of accident to male workers in 1981-82 were : stepping on, striking against, or struck by objects (excluding falling objects), 35,116 cases (32.51 per cent); over-exertion, strenuous, etc. movements, 26,252 cases (24.30 per cent); falls of and jumps by persons, 17,236 cases (15.96 per cent); and struck by falling objects, 8,127 cases (7.52 per cent). Accidents of the type stepping on, striking against, or struck by objects (excluding falling objects) were precipitated by tools and implements (excluding electric hand tools) in 6,410 cases (18.25 per cent); "other materials, substances, and radiations" in 5,381 cases (15.32 per cent); and traffic and working surfaces in 4,288 cases (12.21 per cent). Where the worker fell or jumped, the agency of accident was traffic and working surfaces in 8,077 cases (46.86 per cent) and trucks and other motor vehicles in 2,271 cases (13.17 per cent). In accidents of the type over-exertion, strenuous, etc. movements, the principal agencies of accident were: "other materials, substances, and radiations", 8,064 cases (30.71 per cent); crates and other containers, 4,734 cases (18.03 per cent); and other tools and implements, 1,910 cases (7.27 per cent).

The principal types of accident to female workers in 1981-82 were : over-exertion, strenuous, etc. movements, 5,915 cases (26.63 per cent); stepping on, striking against, or struck by objects (excluding falling objects), 5,681 cases (25.57 per cent); and falls of and jumps by persons 4,951 cases (22.28 per cent).

NATURE AND LOCATION OF INJURIES (ACCIDENT CASES)

The nature and location of the injuries by accident sustained by male and female workers involved in new compensation cases reported in 1981-82 are summarised in Table 9 on page 14 and Table 10 on Page 15 respectively. Where more than one injury is sustained in an accident, the case is classified to the most severe injury. In reporting the nature of injury, particularly in cases where amputation or enucleation results, the result, as known at the time of completing the return in respect of the accident, may be reported instead of the nature of the original injury. For example, where an employee's leg is crushed in an accident and subsequently amputated, the nature of injury may be reported as amputation of leg instead of crushed leg. This should be borne in mind in interpreting the figures. Most injuries to male workers are in the nature of sprains and strains. In 1981-82, these represented 41 per cent of total injuries caused by accident, while lacerations and open wounds represented 18 per cent, contusions and crushings represented 17 per cent, and fractures represented 9 per cent. Injuries to upper limbs were more numerous than injuries to other parts of the body; they numbered 36,477 and included 13,511 cases of lacerations and open wounds, 7,851 cases of sprains and strains, 6,668 cases of contusions and crushings, and 4,876 cases of fractures. Amputations numbered 361, most of these involved loss of a finger or joint thereof, but in 6 cases a hand and in 9 cases a leg or foot, was amputated. There were 2 cases of enucleations of an eye. Cases of concussion and internal injury of the brain numbered 476; fractures of the skull, 97, fracture of the nose, 150, and superficial injury to the eye (mainly due to foreign bodies entering the eye), 2,898. Injuries to the trunk included strained back, 20,169, fracture of chest or ribs, 732, and hernia, 1,438.

Most injuries to female workers are in the nature of sprains and strains. In 1981-82, these represented 48 per cent of total injuries by accident, while contusions and crushing represented 17 per cent, lacerations and open wounds represented 13 per cent, and fractures represented 9 per cent. Injuries to upper limbs were more numerous than injuries to other parts of the body; they numbered 7,359 and included 2,478 cases of sprains and strains, 2,128 cases of lacerations and open wounds, 1,113 cases of contusions and crushings, and 951 cases of fractures. Amputations numbered 30; of these, 29 cases involved loss of a finger or joint and there was 1 case of enucleation of an eye. Cases of concussion and internal injury of the brain numbered 170; fractures of the skull, 9, fractures of the nose, 34, and superficial injury to the eye (mainly due to foreign bodies entering the eye), 167. Injuries to the trunk included strained back, 4,165, fracture of chest or ribs, 107, and hernia, 51.

INJURIES BY DISEASE

Compensable cases of injuries by disease are classified according to the Eighth Revision of the International Classification of Diseases, Injuries, and Causes of Death.

Particulars of the classification to which new compensable disease cases reported in 1981-82 were assigned, are given in Table 11 on page 16.

TABLE 9. NEW COMPENSATION CASES REPORTED, 1981-82 : ACCIDENT CASES INVOLVING MALE WORKERS

CLASSIFIED BY NATURE AND LOCATION OF INJURY

(Excluding cases of less than three days' incapacity)

Nature of injury (a)	Location of injury (a)							Total accident cases
	Head and neck	Trunk	Upper limb	Lower limb	Multiple locations	General injuries	Other (incl. unspecified locations)

Synovitis, bursitis, and tenosynovitis	764	1,499	2,263	6.29	54.83	15.20
Other diseases of the musculoskeletal system and connective tissue	318	194	512	2.61	7.10	3.44
Other diseases, symptoms, and ill-defined conditions	47	9	56	0.39	0.33	0.38
Total	12,151	2,734	14,885	100.00	100.00	100.00

(a) See text preceding Table 1.

Table XI of Part II shows new compensable disease cases in 1981-82 classified according to the nature of disease and classification of employment. Amongst males, the diseases to which the greatest numbers of "injury by disease" cases were assigned were industrial deafness, 8,701 cases (71.61 per cent), and dermatitis, 851 cases (7.00 per cent). Fifty per cent of the cases of industrial deafness occurred in the metals, machinery manufacturing, etc. class of employment, but cases of dermatitis were spread throughout all classes.

Amongst male workers, the largest number of cases of dermatitis in an industry class was 209 in the metals, machinery manufacturing, etc. class (accounting, however, for only 4 per cent of all "injuries by disease" in this industry class).

SECTION B. COMPENSABLE INJURY CASES TERMINATED

DURATION OF COMPENSATION

Particulars of the duration of compensation in cases compensated by weekly payments, and in respect of which no lump sum payments were made, are given in the next table. These particulars relate to cases terminated during 1981-82 and not (as in preceding tables) to new cases reported in the year. For cases terminated in 1981-82, the average duration was 3.4 weeks for male workers and 3.8 weeks for female workers.

TABLE 12. COMPENSATION CASES TERMINATED IN 1981-82 : DURATION OF WEEKLY PAYMENTS

(Excluding cases of less than three days' incapacity)

Duration of weekly payments	Cases terminated		Proportion of total	
	Male workers	Female workers	Male workers	Female workers
Under 1 week	25,331	4,959	per cent 25.63	per cent 24.63
1 week and under 2 weeks	33,167	6,864	33.56	34.10
2 weeks and under 3 weeks	13,434	2,760	13.59	13.71
3 weeks " " 4 weeks	6,849	1,343	6.93	6.67
4 weeks " " 8 weeks	11,421	2,287	11.56	11.36
8 weeks " " 12 weeks	3,940	813	3.99	4.04
12 weeks " " 24 weeks	3,137	747	3.17	3.71
24 weeks " " 36 weeks	761	175	0.77	0.87
36 weeks " " 52 weeks	332	92	0.34	0.46
52 weeks " " 78 weeks	179	35	0.18	0.17
78 weeks or more	277	55	0.28	0.27
Total cases terminated	98,828	20,130	100.00	100.00

In respect of male workers, the duration of weekly payments was less than two weeks in 59.2 per cent of the weekly payment cases terminated in 1981-82 and less than eight weeks in 91.3 per cent of such cases. For female workers, the proportions were 58.7 per cent and 90.5 per cent, respectively.

Table 13 on page 18 shows, for cases compensated by weekly payments, the average duration of cases terminated in 1981-82 in each class of employment. The average duration for male workers was greatest (4.5 weeks) in Mining and Mineral treatment, quarrying, and least (2.7 weeks) in leather manufacturing.

TABLE 13. COMPENSATION CASES TERMINATED IN 1981-82
 CLASSIFICATION OF EMPLOYMENT AND AVERAGE DURATION OF WEEKLY PAYMENTS
 (Excluding cases of less than three days' incapacity)

Classification of employment (a)	Average duration of weekly payments	
	Male workers	Female workers
	weeks	weeks
Agricultural, horticultural, and other rural	4.29	3.17
Amusement, art, sport	3.52	4.24
Building	3.70	3.22
Clothing, textiles, upholstery manufacturing	3.11	3.57
Construction, maintenance, etc.	3.27	3.37
Domestic and home services	3.88	4.20
Food and drink manufacturing	2.77	3.65
Leather manufacturing	2.74	3.41
Metals, machinery manufacturing, repairing, metal working	2.97	4.25
Mining and mineral treatment, quarrying	4.52	3.68
Miscellaneous manufacturing	3.37	4.28
Paper, printing, etc.	3.36	3.51
Personal service	3.65	3.74
Plastics manufacturing	3.26	3.64
Professional (including clerical and administrative)	4.31	3.82
Stone, clay, etc. manufacturing	3.15	2.55
Transport (air, land, water)	4.49	5.49
Wholesale, retail, and bond stores	2.91	3.36
Woodworking	2.87	2.48
All classifications of employment	3.42	3.77

(a) As prescribed by Regulations under the Workers' Compensation Act.

AVERAGE AMOUNT OF COMPENSATION

Particulars of the average amount of compensation per case in respect of all compensation cases terminated during 1981-82 are given in Table 14 on page 19. These particulars cover all payments (irrespective of the year of payment) in respect of cases which involved the death of an employee or the incapacity of an employee for three or more days.

TABLE 14. COMPENSATION CASES TERMINATED IN 1981-82 : AVERAGE AMOUNT OF COMPENSATION PER CASE

(Excluding cases of less than three days' incapacity)

Particulars	Average amount of compensation		
	Male workers	Female workers	All workers
	\$	\$	\$
Fatal cases	20,647.51	9,121.24	20,206.08
Disability cases compensated by -			
Lump sum settlement	8,751.20	21,662.50	9,946.11
Weekly payments -			
Workers and dependants	770.41	632.21	748.60
Medical treatment (a)	236.10	231.35	235.35
Total	1,006.51	863.56	983.95
All cases	1,811.08	2,038.71	1,845.59

(a) Includes medical, hospital, and ambulance expenses, damage to clothing, etc.

SECTION C. AMOUNT OF COMPENSATION PAID

The total amount of compensation paid under the Workers' Compensation Act in each of the last six years is shown in Table 15 on page 20. The compensation paid in a particular year includes payments in respect of some cases first reported in earlier years and excludes payments yet to be made on claims not finalised by the end of the year; accordingly, the compensation payments during a year cannot be related to the new compensation cases reported in that year. Amounts shown on page 20 are gross payments - payments recovered by insurers during the year (e.g. as a result of damages awarded to a worker under motor vehicle third-party insurance) have not been deducted. Payments recovered by insurers during 1981-82 totalled \$10,158,723.

Self-insurers paid \$50,128,744 (12 per cent of the total compensation payments in 1981-82), and licensed insurers paid \$375,679,853 (88 per cent).

Particulars of the compensation paid during 1981-82 in cases where the injury sustained resulted in death or incapacity for three or more days are given in Table 16 on page 20.

TABLE 15. TOTAL COMPENSATION PAID (a), 1976-77 TO 1981-82

Year ended 30 June	For death or incapacity of three days or more	For incapacity of less than three days	Minor injuries (b)	Total
	\$	\$	\$	\$
1977	148,219,879	2,329,021	2,223,150	152,772,050
1978	182,332,785	3,357,033	2,692,876	188,382,694
1979	234,249,284	4,403,448	3,115,155	241,767,887
1980	278,175,117	4,749,974	3,564,467	286,489,558
1981	338,972,633	5,867,909	3,920,421	348,760,963
1982	414,318,919	6,065,192	5,424,486	425,808,597

(a) Includes medical, hospital, and ambulance expenses, and damage to clothing, etc., but excludes legal costs, alternative benefits under common law, and transport and investigation expenses. (b) Minor injuries for which medical treatment only was provided.

TABLE 16. COMPENSATION PAID (a) FOR CASES RESULTING IN DEATH OR INCAPACITY
FOR THREE DAYS OR MORE, 1981-82

Particulars	Male workers	Female workers	All workers
	\$	\$	\$
Fatal cases	7,295,631	107,786	7,403,417
Disability cases compensated by -			
Lump sum settlement	124,029,168	29,378,613	153,407,781
Weekly payments -			
Workers and dependants	160,459,821	32,924,467	193,384,289
Ambulance expenses	967,891	138,492	1,106,383
Medical expenses	27,316,010	6,687,401	34,003,410
Hospital expenses	20,846,089	3,960,486	24,806,576
Damage to clothing, etc.	173,896	33,167	207,063
Total, weekly payments	209,763,707	43,744,014	253,507,721
Total, disability cases	333,792,876	73,122,627	406,915,502
Total, all cases	341,088,506	73,230,413	414,318,919

(a) See footnote (a) to Table 15.

A classification of compensation payments during 1981-82 according to the class of employment of the workers compensated, is shown in Table 17 on page 21.

TABLE 17. COMPENSATION PAID (a) FOR CASES RESULTING IN DEATH OR INCAPACITY FOR THREE DAYS OR MORE, 1981-82 : CLASSIFICATION OF EMPLOYMENT

PART II - DETAILED TABLES OF STATISTICS

TABLE I - COMPENSATION PAID (a) DURING 1981-82 IN RESPECT
OF CASES ON DAILY OR OTHER PERIODIC JOURNEYS

Particulars	Amounts paid \$
MALES	
Compensation in respect of -	
Workers and dependants	15,248,847
Medical treatment	2,077,328
Hospital and ambulance	2,619,158
Damage to clothing, etc.	30,795
Total	19,976,128
FEMALES	
Compensation in respect of -	
Workers and dependants	7,909,494
Medical treatment	1,290,489
Hospital and ambulance	892,371
Damage to clothing, etc.	14,308
Total	10,106,662
PERSONS	
Compensation in respect of -	
Workers and dependants	23,158,341
Medical treatment	3,367,817
Hospital and ambulance	3,511,529
Damage to clothing, etc.	45,103
Total	30,082,790

(a) Excludes compensation paid in respect of cases of less than three days' incapacity.

TABLE II. COMPENSATION PAID (a), 1981-82 : CLASSIFICATION OF EMPLOYMENT AND TYPE OF PAYMENT
